Essentials of Supply Chain Management

Overview

Learn the critical foundational concepts required to lead an integrated supply chain operation. Develop common performance metrics, improve customer satisfaction, maximize capital turnover, and enhance alliances and partnerships. An industry case study and team-based simulation will strengthen new knowledge by providing hands-on learning opportunities.

Who Should Attend

This course is ideal for mid- to senior-level managers and directors who are new to supply chain processes and searching for best practices. Those who work as functional counterparts in finance, information systems, manufacturing, or marketing will also benefit. Titles of participants have included:
- Director, Distribution and Transportation
- Senior Manager, Supply Services
- Logistics Management Specialist

Program Benefits

Improve your ability to:
- Manage your supply chain to avoid functional pitfalls
- Minimize supply chain costs while maintaining or improving customer service
- Improve pooling, postponement, and other inventory deployment strategies
- Develop common performance metrics
- Improve customer satisfaction through shorter cycle times, maximizing capital turnover
- Use information technology to enhance performance

At Penn State

3-Day Short Course

Location: University Park, PA

This course fulfills a requirement for the Professional Certificate in Supply Chain Management.

Please see our Schedule on the web for current dates.

Value For You & Your Organization

A valuable supply chain simulation exercise called LINKS will provide hands-on learning in all major supply chain elements: suppliers, manufacturers, distributors, retailers, and end-users. You’ll apply newly-learned concepts and make high-level decisions as you lead a “firm” in competition with your team by selling a “product” in three regional markets. You will return to your organization having learned best practices for managing the entirety of your supply chain.

“One of the best logistics courses I’ve attended! The faculty were well prepared and professional. The material was grounded in theory and full of examples and practical application. The examples of similarities in the business and defense industry were enlightening for all attendees. I would highly recommend it . . . A First Class Operation!”

Lt.Col. J. Reggie Hall
Executive Officer to the Assistant, Air Force Deputy Chief of Staff for Installations and Logistics
